

TY WORK PLACEMENT PROJECTS

What types of projects can you work on?

1 Video Editing Project

You will develop a promotional video that launches a product /service to a particular target market. Opportunities to be creative and develop digital skills.

2 Sustainability & Environmental Project

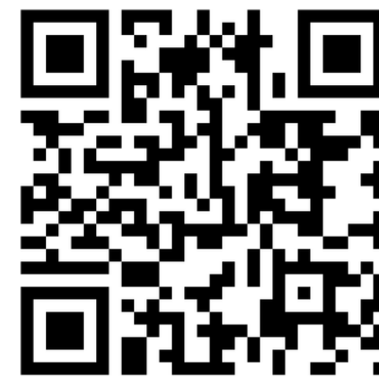

You will research and develop an environmental campaign for an Industry Partner. A chance to focus on making changes that matter.

3 Data Analytics Project

You will have the opportunity to analyse data and present key findings to an Industry Partner's client. A chance to be analytical and creative.

4 Recruitment Campaign Project

You will research and develop a targeted recruitment campaign for an Industry Partner. Innovative ideas are needed to promote your company to future employees.

5 Digital Media Project

6 Legal Project

You will research legal and ethical issues related to a new technology. You get to think about what's legal, what's right & wrong and how we live with technology in today's world.

INTERESTED IN DOING SOMETHING MORE TECHNICAL?

7 Digital Technology Project

You will redesign or improve an existing technical solution in areas such as: Cybersecurity, Artificial Intelligence or Data Science. This project does not require coding or programming skills.

8 Technology Plus Project

You will develop a technical solution to a problem. This is a chance for you to showcase your coding and technical abilities and learn about the key skills required in software development.
